High Durability Polyester Premium Coil Coating

Providing excellent long term gloss retention and corrosion protection in severe environments. Formulated with a propriety high durability polyester resin for resistance to chalking and fading and contains high quality exterior grade pigmentation to provide superior color stability.

Coatings feature our special stain resistant resin that improves scratch and metal marking resistance. These coatings are tough yet flexible enough to be embossed and easily take a 1-T bend in roll forming.

A durability coating system designed to be applied as a two coat primer / finish system. Primer should be used to provide exceptional corrosion protection. Our backer competes the system and provides excellent "wet stack" corrosion protection and its internal lubricants assist roll forming.
